

Rolshan Simon Lewis

SAP SD Project Manager | S/4HANA Transformation Specialist

SUMMARY

SAP SD Project Manager with 19+ years of experience delivering SAP ECC and S/4HANA implementations across UAE, USA, and Europe. Expert in Order-to-Cash (OTC) with strong SD-MM-FI cross-functional integration, project system coordination, procurement-to-cash optimization, and a proven track record in permanent enterprise delivery roles.

SKILLS

SAP S/4HANA & ECC | SAP SD (Order-to-Cash) | SAP PS (WBS, Milestone Billing) | SD-MM-FI Integration | SAP MM (Procurement, IM) | Pricing & ATP | Credit Management | IDOC / EDI Integration | SAP RISE Framework | E-Invoicing (KSeF, Peppol) | Data Migration & UAT | Go-Live & Hypercare

EXPERIENCE

SAP SD Project Manager — ITHR Consulting LLC

Sep 2024 – Present • Dubai, UAE

Led end-to-end S/4HANA implementation for Tropicana Brand Group across 9 manufacturing plants, managing master data for over 1,500 materials and designing robust SD-MM/WM integration workflows. Achieved a zero-disruption go-live while reducing supply chain and order delays by 30% and improving billing accuracy by 25%. Oversaw complex E-invoicing implementations across Belgium and Poland with Peppol and KSeF compliance, coordinating CPI cloud integration between SAP ECC, S/4HANA, and regional government clearance portals.

- Led end-to-end S/4HANA implementation across 9 manufacturing plants and managed a master data catalog of 1,500+ materials for Tropicana Brand Group
- Designed robust SD-MM/WM integration workflows, successfully reducing supply chain and order delays by 30%
- Improved billing and invoice accuracy by 25% while achieving a completely seamless, zero-disruption system go-live
- Oversaw complex E-invoicing implementations across legal entities in Belgium and Poland, integrating smoothly with Peppol and KSeF compliance systems
- Coordinated CPI cloud integration leveraging SAP ECC & S/4HANA IDocs to ensure seamless automated communication with regional government clearance portals

Senior SAP Analyst — DEWA (Moro Hub)

Dec 2018 – Jun 2024 • Dubai, UAE

Delivered full-lifecycle SAP ECC to S/4HANA migration for DEWA with comprehensive Application Management Support, maintaining 99.8% critical uptime. Designed and implemented milestone billing and Resource-Related Billing leveraging SAP PS and SD integration to streamline institutional cash flows and automate revenue recognition, while mapping Sales Orders to WBS elements to eliminate manual reconciliations. Automated cross-module SD-MM scrap sales workflows and optimized material management integration, improving financial auditing accuracy by 40% and shortening procurement cycles by 35%.

- Delivered a full-lifecycle SAP ECC to S/4HANA migration and provided high-availability Application Management Support (AMS), consistently maintaining a 99.8% critical uptime profile
- Designed and implemented milestone billing and Resource-Related Billing (RRB) leveraging deep SAP PS and SD cross-module configuration to streamline institutional cash flows and automate revenue recognition protocols
- Mapped and linked commercial Sales Orders directly to account-assigned WBS elements to automate tracked transfer variances between planned budgets and actual project delivery revenue, eliminating manual multi-team reconciliations
- Automated cross-module SD-MM scrap sales and decommissioning workflows to step up financial auditing accuracy by 40%
- Optimized material management integration to shorten manual procurement turnaround cycles by 35%

SAP SD Lead — Fujitsu

Nov 2016 – Dec 2018 • Region Scope

Managed complex SAP SD-MM cross-functional localization rollouts across 5 strategic Southeast Asian countries for Fujitsu. Architected integrated supply chain checks and automated balancing parameters that reduced cross-facility stock mismatches by 20%.

- Managed complex SAP SD-MM cross-functional localization rollouts across 5 strategic Southeast Asian countries
- Architected integrated supply chain checks and automated balancing parameters to reduce cross-facility stock mismatches by 20%

SAP SD Lead — Accenture

Aug 2013 – Dec 2014 • Global Scope

Drove large-scale legacy system upgrade initiatives from SAP R/3 4.6 to ECC 6.0 standards at Accenture. Redefined system billing runs and automated processing streams, lowering end-to-end invoice cycle times by 15%.

- Drove large-scale legacy system upgrade initiatives from SAP R/3 4.6 to corporate ECC 6.0 standards
- Redefined system billing runs and automated processing streams to lower end-to-end invoice cycle times by 15%
